Index

Volume 16, 1984

Cumulative index for Volumes 1-15 (1969-1983)		1
Chairman's Address—Confront change—and seek new perspectives	P. T. Stone	25
Variation of near visual acuity with illuminance for a group of 27 partially-sighted people	Warren G. Julian	34
Computer-aided optimal lighting systems design	Aly Hassan Fahmy	42
The development of tungsten filament lamps	R. Burgin	61
Trends in HPS lamp technology	Hidezoh Akutsu	73
National Illumination Committee of Great Britain. Report for the year ended 30 September 1983		85
Interaction of the low-pressure mercury discharge with soda-lime glass	M. J. Fuller	113
Colour rendering and spectral power distribution—a new parametric approach	J. J. Embrechts	119
The development of daylighting—a British view	J. B. Collins	155
An investigation of task lighting for offices	G. T. McKennan and C. M. Parry	171
Point-by-point illuminance from uplighters	L. Bedocs, J. R. Hugill and J. A. Lynes	187
A simple computer program for designing standard high-pressure sodium lamps	P. L. Denbigh and B. F. Jones	193

Research Notes

Communication theory approach to measuring the goodness of seeing	H. Xu	98
The effect of illuminance on the performance of domestic kitchen work by two age groups	P. J. McGuiness and P. R. Boyce	131
Temperature variation of sodium and mercury partial pressures over sodium amalgams	B. F. Jones and S. A. Mucklejohn	137
Predicting intensity distribution from symmetrical reflectors with large sources of light	J. G. Vizmanos and M. Quintanilla	140
Incorporating body-tinted glazing into daylight computer models	S. Sharples, J. K. Page and C. G. Souster	143

Correspondence 52, 200

Book Reviews 104

Abstracts 54, 106, 146, 201

New Publications 60, 112, 153, 204
